

**** FAA PILOT REGISTRATION NOW REQUIRED TO FLY ****

Effective February 19, 2016, all pilots flying radio controlled aircraft weighing between .55 lbs and 55 lbs need to be registered with the FAA.

The process is online and can be complete in 10 minutes or less: requires an email address and a credit card to complete. Click “REGISTER MY DRONE” The fee is \$5 for a 3 year registration.

After completing your registration with the FAA, you should:

- Print the card and have it with you when you fly (the club can laminate it for you if you ask)
- Record the number somewhere on each aircraft you fly, inside or outside is ok

There is ONLY ONE PLACE TO REGISTER – don’t be fooled by a Google search coming up with sites offering to do this for a fee.

Official FAA Registration Site:
